3. INVOCATION

Dr. Amy Cabrera Rasmussen, CSULB Assoc. Professor, Dept. of Political Science

"The precise role of the artist is to illuminate darkness. Blaze roads through that vast forest, so that we will not, in all our doing, lose sight of its purpose, which is, after all, to make the world a more human dwelling place. The artist is distinguished from all other responsible actors in society — the politicians, legislators, educators, and scientists — by the fact that he is his own test tube, his own laboratory, working according to very rigorous rules, however unstated these may be, and cannot allow any consideration to supersede his responsibility to reveal all that he can possibly discover concerning the mystery of the human being. Society must accept some things as real; but he must always know that visible reality hides a deeper one, and that all our action and achievement rest on things unseen. A society must assume that it is stable, but the artist must know, and he must let us know, that there is nothing stable under heaven. One cannot possibly build a school, teach a child, or drive a car without taking some things for granted. The artist cannot and must not take anything for granted, but must drive to the heart of every answer and expose the question the answer hides." — James Baldwin, *The Price of the Ticket – The Creative Process*

Let us see political science as an art, not a science.

- This resolution to boycott Israel is not about the peace process
- Familiar to the boycott of Jewish individuals

- Believes that the resolution is using economic weapons to damage another country
- Not about advancing the peace process but about advancing the war process

Josh Burger, Student, Self-Identified Israeli American, reported the following:

- Has visited Israel three times
- Seen the conflict first hand and believes the only way to solve it is direct negotiation to create two states for Palestinians and Israelis
- Resolution is not the solution and has a negative impact on both peoples

- Given the current campus climate and hate crimes against the Jewish community, this resolution would only perpetuate the animosity that our community has been experiencing.

- It is difficult to be in a position where 2/3 of who you are is accepted while the rest is not

Matthew Taylor, Student, reported the following:

- Israel is still not recognized by 31 United Nations members as a state.
- Lack of recognition is a threat to Israel's national security and the economic interests of the United States
- "It encourages the students of CSULB and CSULB auxiliaries to divest from ... so long as they take part in the oppression of Palestinians... by boycotting these CSULB will lose lots of funding which will only make it more difficult to graduate in four years.

Asia Gonzalez, Student, reported the following:

6. ANNOUNCEMENTS FROM THE CHAIR

“Dear Senators, yesterday we received a letter from campus leadership regarding the various concerns about the current work this board is addressing. I speak on behalf of myself only that I appreciate the long-awaited involvement of the campus administration and leadership into the critical work that we conduct here in Senate. I welcome the comments of our campus administration as I do other non-student campus community comments such as Richard and Lindsay.

While I was reading the letter, it reminded me of something that was said to me during my first executive training and something that I have said to you all multiple times this year. It is the idea that everyone is here, everyone at this table is here because other students have believed in us, trusted us to represent and empower them. Each vote we have all received, whether from the general student body or from other Senators from this board, is another CSULB student putting their trust and faith that we all here at this table will seek to represent them in the best way that we can.

Our mission statement says, “The Associated Students is committed to the principle of student self-determination in the shared governance of the university” Self-determination is the idea that each and every one of us should be able to control our own life and to have input and control in the institutions and systems that control, regulate, and oppress them. This is essentially what this board has spent the past year doing, ensuring that the self-determination of students, within the confines of a campus institution that seeks to control us.

In our About ASI, it states that Associated Students is the official voice for the students of CSULB. ASI is officially recognized in the state of California as the official voice of the student body here at California State University, Long Beach. The student government represents the student body, advocates their needs, and defends their interests in dealing with faculty, campus administrators, or government officials. Outlined in the Chapter 1 bylaws, the AS purpose is to ensure the full and equal representation in the affairs and the government of this association and its members. AS purpose is to increase competency in this practice of democratic citizenship among its members of this institution.

I value the input of all of our partners in the shared governance process at CSULB but my duty and roll begins and ends in the representation and advocacy for student voices. Especially those who have been systematically and continually silenced in a system that benefits off the hegemonic control of those who are in charge. I hope you all do as well.”
